

EHIK PUMPS

— FOR ROTO-JET PUMP USERS

Pickup tubes and rotor assemblies, in stock.

Replacement parts and complete overhauls for Roto-Jet and other pitot tube pumps.

From EHIK, pitot tube pump specialists since 2004
ehikpumps.com

— WHY EHIK PARTS

Four reasons to choose EHIK parts.

01

No old tube to return

You do not need to send back your old pickup tube to order a new one. Tell us the pump model and the duty, and we send a drawing to confirm the fit.

02

In stock, ready to ship

We keep pickup tubes and rotor assemblies in stock. Items in stock ship after payment.

03

Longer tube life

In liquids with a high content of hard particles, a standard tube may need replacing after 1–3 weeks. Our wear-resistant coated tube can last 2–3 months.

04

A stronger tube joint

One large threaded nut holds the pickup tube in place of several small bolts. Fewer parts and a more stable connection.

COMPLETE OVERHAULS

We also overhaul complete pumps.

We overhaul complete Roto-Jet pumps and replace the worn parts. Our work includes Roto-Jet pumps for a carbon black plant in Tianjin.

An overhauled Roto-Jet pump, packed for shipment.

HOW TO ORDER

1

Tell us the pump and duty

Pump model, liquid, flow and head. Inlet and outlet pressures and NPSHa help us check more accurately.

2

We confirm the fit

We send a drawing of the part for you to check before we supply.

3

We ship

Items in stock ship after payment. Other items usually ship in 20–60 days.

PITOT TUBE PUMP SPECIALISTS

Since 2004, one product only.

We make one product: the pitot tube pump. We design, assemble, test and repair it ourselves, so we know every part in detail. Factory in Gu'an, Hebei, near Beijing.
